Graph sources
Varied or measured
Two separate evaluations
Expert graph
978 prerequisites (Junyi)
LLM graphs
Qwen2.5-7B, Llama-3.1-8B
Random controls
same-topic, cross-topic
Learned graphs
edge weights learned by KT
Graph properties
coverage
edge correctness
topical proximity
edge direction (simulation)
Structural fidelity
vs expert prerequisites:
ROC AUC, AUPRC, top-K
do they agree?
Predictive utility
first-attempt AUC gain,
PrereqKT and GKT, sparse data
